

# MOTHS

Learn about the biology of moth life cycles, food chains, interactions with other species and the impacts of fire and climate change.

**Friday March 18<sup>th</sup>**

**Newham Mechanics Institute Hall**

7pm drinks & nibbles

**7.30 presentation**

**Supper and night-time viewing to follow**

Presenter *Steve Williams*

will outline life cycle information for individual species of moths, then groups, incrementally building a picture of the species operating in different landscape contexts to illustrate how increasing vegetative biodiversity promotes invertebrates and hence higher animals in the food chain.
