

# FREE WORKSHOP

## NATIVE PASTURES FOR GRAZING

Wednesday 22 November  
10 am to 3pm (lunch provided)

Photos © Sandy Scheltema

**FREE EVENT RUN BY**  
Upper Campaspe Landcare Network  
with Dr Paul Gibson-Roy, lead scientist  
with Greening Australia.

*'By restoring native grasslands people can help to preserve and manage that habitat for future generations. There is less than one percent of native grasslands habitat left in Victoria. That's why their restoration and conservation is so critical. By attending this workshop landowners will get an appreciation of the importance of native grasslands, and why it is so important not to let them disappear for good. By planting and restoring native grasslands there are benefits for both farming and biodiversity.'*

Dr Gibson-Roy

### Learn about:

- creating native grasslands/pasture from scratch
- the benefits of native pastures for biodiversity and grazing
- tipping the balance of your paddock to natives.

RSVP by 17 November to reserve your place.
