

Newham & District Landcare Group

# Regenerative Farming *for* *healthy landscapes*

Can you be a  
'greenie' and a  
productive farmer?  
Absolutely!

Come along to learn  
how conservation  
practices can increase  
farm productivity and  
improve its resilience  
in these  
unpredictable times.

**Jason McAinch**, Regenerative Agriculture adviser to MRSC, will talk about healthy landscapes and how to make them happen.

**David Cheal**, ecologist and Associate Adjunct Professor at Federation University in Ballarat, will talk about conservation and land management. He has a special interest in fire – its direct impacts on biodiversity and the conservation losses resulting from our fear of fire.

**Date: Sunday May 29<sup>th</sup>**

**Time: 1.30 - 4 pm**

**Where:** a small farm in Newham, *address details will be sent on registration*

Free – this event is supported by MRSC and a Landcare grant
